

EUROPEAN SECURITY ROLLER GRILL

The roller grille, unlike other types of security, does not completely cover the exposure and provides secure room ventilation. Used as an additional security barrier against burglary through the patio or back doors in residential homes or business properties.

- ✓ Installation possible in existing and newly constructed facilities
- ✓ Recommended for installation in shopping arcades and public utility buildings
- ✓ Emergency, manual grid opening system as standard
- ✓ Possibility of making the grid in a box or on consoles
- ✓ Choice of tubular or side drive
- ✓ 3 profiles available: PEK 77, PEK 80, EASYLOOK 84
- ✓ Possibility of varnishing in any RAL color
- ✓ Standard protection against uncontrolled lowering of the armor (inertial brake)
- ✓ Optional optical bar or photocells
